EXECUTIVE SUMMARY	1- 15
1 PHYSICAL STEEL MARKETS	23
1.1 OVERVIEW OF THE PHYSICAL PRODUCTS AND PROCESSES	23
1.1.1 <i>A brief history</i>	23
1.1.2 <i>The main steel products</i>	25
1.1.3 <i>The blast furnace technology</i>	26
1.1.4 <i>Electric Arc Furnace (EAF) technology</i>	27
1.1.5 <i>The implication for steel futures and derivatives</i>	28
1.2 BILLET	28
1.2.1 <i>Definition</i>	28
1.2.2 <i>Billet trading volumes</i>	28
1.2.3 <i>Billet net importing countries</i>	29
1.2.4 <i>Billet net exporting countries</i>	31
1.2.5 <i>Transportation</i>	32
1.2.6 <i>Billet geographical flows</i>	33
1.2.7 <i>Billet trading patterns</i>	33
1.2.8 <i>Futures initiative</i>	34
1.3 REINFORCEMENT BAR (REBAR).....	34
1.3.1 <i>Definition</i>	34
1.3.2 <i>Worldwide rebar production</i>	34
1.3.3 <i>Rebar trading volumes</i>	35
1.3.4 <i>Rebar net importing countries</i>	35
1.3.5 <i>Rebar net exporting countries</i>	37
1.3.6 <i>Rebar transportation and trading patterns</i>	37
1.3.7 <i>Rebar geographical flows</i>	38
1.3.8 <i>Futures initiatives</i>	39
1.4 HOT ROLLED PRODUCTS.....	39
1.4.1 <i>Definition and production process</i>	39
1.4.2 <i>Hot rolled production</i>	39
1.4.3 <i>Hot rolled coil trading volumes</i>	40
1.4.4 <i>Hot rolled coil main importing countries</i>	40
1.4.5 <i>Hot rolled coil main exporting countries</i>	41
1.4.6 <i>Hot rolled coil transportation and trading patterns</i>	42
1.4.7 <i>Hot rolled coil geographical flows</i>	43
1.4.8 <i>The US domestic market for hot rolled products</i>	43
<i>The USA has a huge domestic market on its own for hot rolled coil</i>	43
1.4.9 <i>Futures initiatives</i>	44
1.5 CHINA.....	44
2 THE STEEL FUTURES PRODUCT INITIATIVES	46
2.1 LME: THE STEAMROLLER AT FULL SPEED.....	46
2.1.1 <i>LME overview</i>	46
2.1.2 <i>LME membership</i>	48
2.1.3 <i>The relevance of billet futures</i>	50
2.1.4 <i>LME Steel products characteristics</i>	52
2.1.5 <i>Is billet a good hedge for a rebar exposure?</i>	55
2.1.6 <i>SWOT analysis</i>	57
2.2 DGCX: A REGIONAL EXCHANGE FOR A GLOBAL MARKET.....	60
2.2.1 <i>DGCX overview</i>	60
2.2.2 <i>The relevance of a rebar contract</i>	61
2.2.3 <i>DGCX rebar contract</i>	63
2.2.4 <i>SWOT analysis</i>	65
2.3 OTC SWAPS BASED ON CRU INDEX - THE FIRST STEPS FOR FLAT PRODUCT FUTURES?	66
2.3.1 <i>Hot rolled products historical prices and volatility</i>	66
2.3.2 <i>Product characteristics</i>	67
2.3.3 <i>Trading volumes</i>	69

2.3.4	<i>The correlation between hot rolled and cold rolled</i>	69
2.3.5	<i>Market participants</i>	70
2.3.6	<i>SWOT analysis</i>	71
2.4	CME, THE NATURAL EVOLUTION OF A COMMODITY MARKET.....	72
2.4.1	<i>CME Overview</i>	72
2.4.2	<i>Steel product characteristics</i>	74
2.4.3	<i>SWOT analysis</i>	75
2.5	NYMEX: CAN IT COMPETE AGAINST THE CME?.....	76
2.5.1	<i>NYMEX overview</i>	76
2.5.2	<i>Steel product characteristics</i>	78
2.5.3	<i>SWOT analysis</i>	80
2.6	SHANGHAI FUTURES EXCHANGE (SHFE).....	81
2.7	PHYSICAL FUTURES VERSUS FINANCIAL SWAPS.....	82
2.7.1	<i>Physical futures: the ultimate convergence tool</i>	82
2.7.2	<i>Financial swaps: an index can smooth any price disparity</i>	83
2.8	WHICH STEEL FINANCIAL PRODUCT IS MOST LIKELY TO SUCCEED AND WHY?.....	84
2.8.1	<i>Predictions</i>	84
2.8.2	<i>Rationale</i>	84
3	LESSONS FROM OTHER COMMODITIES AND A PREDICTION FOR STEEL TRADING VOLUMES	89
3.1	THE FOUR STEPS IN THE EVOLUTION OF A COMMODITY.....	89
3.2	ANALYSIS OF THE DEVELOPMENT OF RELEVANT COMMODITIES.....	90
3.2.1	<i>The LME aluminum contract: Why did it take so long to take off?</i>	90
3.2.2	<i>LME plastic contract: what lessons can we learn from the relative failure?</i>	94
3.2.3	<i>Coal: a commodity with slow but unstoppable growth</i>	95
3.2.4	<i>Oil: a relevant model but with a slow take off in the Far East</i>	99
3.2.5	<i>Carbon dioxide emission certificates, the rising star. But why can't the model be replicated with steel futures?</i>	101
3.2.6	<i>Freight: a highly fragmented market like steel, on its way to consolidation</i>	104
3.2.7	<i>Lessons and expected trading volumes for steel futures</i>	108
4	COMPANIES/MARKET PARTICIPANTS	112
4.1	THE SLOW CONSOLIDATION PROCESS.....	112
4.2	THE FLAT PRODUCTS SEGMENT: THE LARGEST STEEL MILLS.....	113
4.2.1	<i>The relevance of steel futures for steel producers</i>	113
4.2.2	<i>ArcelorMittal</i>	114
4.2.3	<i>Corus Group Plc (Tata Corus)</i>	118
4.2.4	<i>The Riva Group</i>	121
4.2.5	<i>ThyssenKrupp Stahl</i>	122
	FINANCIAL PERFORMANCE	123
4.2.6	<i>Salzgitter AG</i>	124
4.2.7	<i>Voestalpine AG</i>	125
4.2.8	<i>Erdemir</i>	126
4.2.9	<i>BlueScope Steel</i>	128
4.2.10	<i>Kloekner & Co AG</i>	129
4.2.11	<i>Severstal</i>	130
4.2.12	<i>Evrax Group</i>	133
4.2.13	<i>US Steel (USS)</i>	135
4.2.14	<i>Villacero</i>	136
4.3	THE LONG PRODUCT SEGMENT: A VERY FRAGMENTED MARKET.....	137
4.3.1	<i>Colakoglu Metalurji AS</i>	137
4.3.2	<i>Diler Holdings</i>	138
4.3.3	<i>Hellenic Halyvourgia SA, Greece</i>	139
4.3.4	<i>ISTIL</i>	139
4.3.5	<i>Metinvest</i>	140
4.3.6	<i>Metalloinvest, Russia</i>	141
4.3.7	<i>Al Ezz (EZZ Steel)</i>	142
4.3.8	<i>BRC Ltd (Acertec plc)</i>	143

4.3.9	<i>Celsa Group</i>	144
4.4	THE STEEL END USERS.....	144
4.4.1	<i>Relevance of steel futures for end users</i>	144
4.4.2	<i>Ford Motor Company (USA)</i>	145
4.4.3	<i>General Motors, (GMC)</i>	146
4.4.4	<i>Skanska</i>	147
4.4.5	<i>Terex Corporation</i>	148
4.5	TRADERS.....	149
4.5.1	<i>A new business model</i>	149
4.5.2	<i>Sempra Metals Ltd, UK</i>	150
4.5.3	<i>Koch Metals</i>	151
4.5.4	<i>Duferco Group International</i>	152
4.5.5	<i>MacSteel International</i>	153
4.5.6	<i>Stemcor</i>	154
4.5.7	<i>Cargill</i>	155
4.5.8	<i>Louis Dreyfus</i>	157
4.5.9	<i>Noble</i>	157
4.5.10	<i>Balli Steel, Balli Group</i>	158
4.5.11	<i>Banks</i>	159
5	SETTING UP A TRADING DESK: TOOLKIT	160
5.1	THE RELEVANCE OF HEDGING.....	160
5.1.1	<i>Is there really a choice?</i>	160
5.1.2	<i>Derivatives trading is a casino</i>	161
5.2	DOES FINANCIAL TRADING INCREASE VOLATILITY AND IF SO, WHO COULD BENEFIT FROM IT?.....	161
5.3	THE DEVELOPMENT OF THE FORWARD CURVE, BACKWARDATION AND CONTANGO.....	162
5.3.1	<i>Definitions</i>	162
5.3.2	<i>Trading the forward curve</i>	164
5.3.3	<i>Publication of the forward curve</i>	164
5.4	MARK TO MARKET ACCOUNTING AND ITS IMPLICATIONS.....	164
5.4.1	<i>Definition</i>	164
5.4.2	<i>The challenges to mark-to-market physical position</i>	165
5.5	CLEARING AND THE IMPACT ON CASH FLOWS.....	166
5.6	THE INCREASED IMPORTANCE OF CREDIT AND LEGAL PROTECTION.....	167
5.7	STEEL FINANCIAL PRODUCTS AS PART OF A LARGER COMMODITY TRADING COMPLEX.....	169
5.7.1	<i>Freight derivatives</i>	169
5.7.2	<i>Carbon dioxide certificates</i>	170
5.7.3	<i>The development of iron ore derivatives</i>	172
5.8	SET UP OF A TRADING DESK AND COMPLIANCE.....	173
5.8.1	<i>Counterparties approval</i>	173
5.8.2	<i>International regulation, Sarbanes-Oxley and Basel II</i>	175
5.8.3	<i>Establishment of internal trading limits and rules</i>	176
5.8.4	<i>The right people in place</i>	177
5.8.5	<i>Risk management systems</i>	178
5.8.6	<i>An estimated budget for setting up a trading desk - Is it worth it?</i>	179
